Subject: Disagree with Microsoft Settlement

I will make this brief.

I am in total disagreement with this so-called "settlement". Microsoft has been rightfully convicted as being a monopoly, and therefore should be severely punished. This "settlement" is simply a slap on the wrist and will NOT change this company's predatory and dominating behavior. The DOJ has wasted years of effort, and money, if this "settlement" is adopted. I strongly urge the DOJ to reconsider its position and do whatever it takes to allow FAIR competition to return to not only the computer OS market, but to whatever Microsoft decides to conquer next (PDAs, Gaming Consoles, etc.)

Thank you.
